9. With reference to the NIS publications listed in 4, above, what are the major shortcomings you have found in the NIS? (Please relate these to your own needs, considering adequacy of coverage, reliability of content, currency, length and detail of presentation, and security classification.) _____

In general, the NIS has very few shortcomings. There have been,
however, instances of overclassification (ie; maps on
page 20 & 22, NIS 3,
General Survey, France, Sept 68). Also, the utilization of pastel
colors for maps makes them more difficult to reproduce if and when
needed in 35mm slide form, ie; figure 29, page 23 &
figure 71, page 151, GS-France would not
reproduce well as a slide, but Figure 17, page 13 would be fine.)
The GS on France has been used as an example only.

10. What specific suggestions can you make for improving the content (including graphics), coverage, organization, and format of NIS units? _____

Darker colored hues in the reproduction of maps, as stated above.

The NIS General Survey, complemented by the Basic Intelligence
Factbook, have been most valuable to this section in keeping the
Command abreast of worldwide developments.
